

Company Security Policy - Version 1 (June 2024)

1. Data Encryption:

- All sensitive data is encrypted using AES-128 encryption standard.
- Encryption keys are managed manually by the IT department.

2. Access Control:

- Employees must use single-factor authentication (password only) to access internal systems.
- Access logs are maintained for 30 days.

3. Incident Response:

- Security incidents are reported via email to the IT team.
- Response time is within 48 hours.
