

Company Security Policy - Version 2 (July 2025)

1. Data Encryption:

- All sensitive data is encrypted using AES-256 encryption standard.
- Encryption keys are managed using an automated key management system.

2. Access Control:

- Employees must use two-factor authentication (password + OTP) to access internal systems.
- Access logs are maintained for 90 days.

3. Incident Response:

- Security incidents are reported via a dedicated incident management portal.
- Response time is within 24 hours.
